

Adaptable grid for clothing the tiles

## DESCRIPTION

Using for all mediterranean-style tiles, 'high profiled tiles'.

Possibility of using a dot of glue to optimize fixing.

The outer part of the grid adapts to various forms of tiles. Prevent the intrusion of pests while maintaining the ventilation of the roof. Easy installation (by nailing or screwing) on the fascia board.

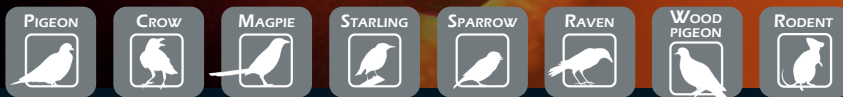

The grid can also be installed with glue by folding the lowerpart 90°:

- 1) Seal the chimney flashings, skylights, solar panels.
- 2) Roof tiles closures, fitted on the hips and valleys roof.

 **ECOPIC® tile products comply with all french standards requirements for ventilation of roofs (DTU 40.21, 40.22...)**

Adaptable grid for clothing the tiles

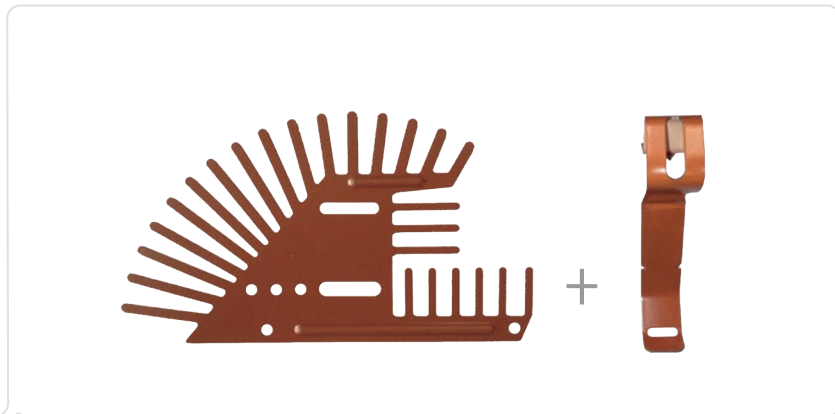

## ECOPIC® TILE TR

REF.	DESCRIPTION	PACKAGING
STOP010	ECOPIC® Tile TR	box of 50 units

- Grid :
- Double sided lacquered aluminium.
  - Thickness : 0,70 mm
  - Height : 85 mm
  - Width : 150 mm

- + Removable mouting clips, red tile colour :
- Lackered steel
  - Height : 20 mm
  - Width : 85 mm

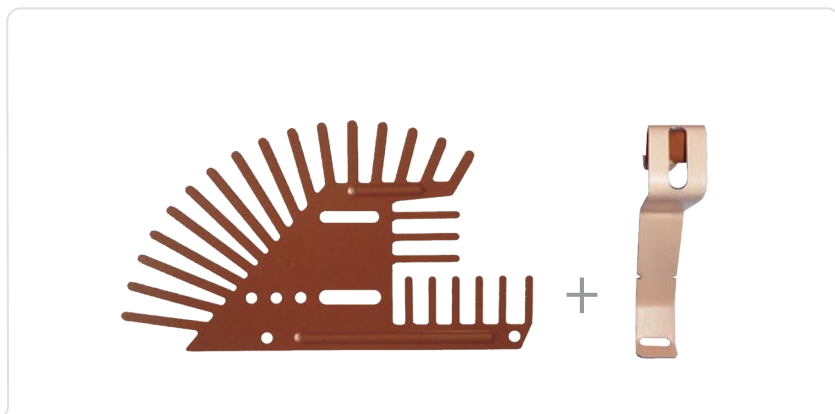

## ECOPIC® TILE TV

REF.	DESCRIPTION	PACKAGING
STOP011	ECOPIC® Tile TV	box of 50 units

- Grid :
